

Let's shape the future of connected logistics!

Join our Innovation Hub in Berlin as

App Developer (iOS, Android, Xamarin) (m/f)

Our Berlin Innovation Hub is a space for invention and creation: we push the boundaries of connected logistics systems enabled by Internet-of-Things, artificial intelligence and big data science. We are creators and developers, designers and creatives, techies and data scientists. Our way of working is collaborative: rapid prototyping for validated learning and creating MVPs is second nature for us.

We are working on delivering unique digital products, services and new data-driven business models that bring value to the global logistics ecosystem.

Tasks

- Develop ideas and translate design and user requirements into a mobile testbed, MVP and store-ready fully-functional app
- Ensure the technical feasibility of UI/UX designs
- Collaborate with designers and back-end developers
- Build and drive development in native iOS (Objective C, Swift), and/or Android (JAVA) and/or Xamarin (C#) apps
- Drive test automation (Specta, Quick, JUnit, NUnit) for mobile applications
- Deploy continuous integration and continuous delivery
- You have an aptitude for rapidly learning new concepts and technologies and applying them in an agile manner
- You have up-to-date and comprehensive knowledge of current technology trends and you love working in agile teams

Relevant experiences

We'd love to hear from candidates with at least three (3) years commercial experience in a fast-paced, tech-driven/startup environment.

You should demonstrate that you've built a native iOS/Android or Xamarin app, from idea to launch and on-going updates with the passion to always push your product to the next level.

App Developer candidates ideally have a background in informatics, computer science, engineering or comparable studies, and should be well-versed in one or more of the following technologies, tools and methodologies:

- Objective C, Swift, JAVA, C#, Mac OSX-Server, Jenkins, Xcode, IntelliJ, Eclipse, Maven, Git, Android Developer Tools, Jira, Confluence, Android networking and REST Web Services
- Behaviour Driven Development (Specta, Quick, JUnit)
- Product Development (HW/SW)
- Agile Project Management (Scrum, Kanban)
- Understanding of UX and UI design principles
- Experience in Backend Development (Rails, Spring, Node.js) is an advantage

What we offer you

- Innovative environment working for the B2B pioneer in automotive connectivity solutions
- Thrilling projects in international interdisciplinary teams with global market impact
- Attractive compensation package
- Creative atmosphere in co-working space Ahoy! Berlin
- Flat hierarchy, open collaborative culture, with English as primary language (German beneficial)
- Plenty of room for your own ideas and self-organised work to see your ideas come to life and scale globally
- Liaison with the Daimler group with the flexibility of a digital innovation lab

The job is full-time and limited to a term of two (2) years with the option of a permanent employment contract.

Location: Berlin

How to apply for App Developer

Send us an email to innovationhub@fleetboard.com, with desired salary, earliest availability and with your CV.

In your email application, please explain one of your major coding challenges in the past two years: What was it about, how did you approach and solve it, what have you learned. If you have any code to share that would be a plus, but it's not required. One page will be sufficient.
