

# Let's shape the future of connected logistics!

Join our Innovation Hub in Berlin as

## Frontend / Web Developer (m/f)

Our Berlin Innovation Hub is a space for invention and creation: we push the boundaries of connected logistics systems enabled by Internet-of-Things, artificial intelligence and big data science. We are creators and developers, designers and creatives, techies and data scientists. Our way of working is collaborative: rapid prototyping for validated learning and creating MVPs is second nature for us.

We are working on delivering unique digital products, services and new data-driven business models that bring value to the global logistics ecosystem.

### Tasks

- Develop ideas and translate design and user requirements into a web experience that is a web testbed or MVP
- Ensure the technical feasibility of UI/UX designs
- Collaborate with designers and back-end developers
- Build and drive development of web applications with user-facing features
- Drive test automation for web applications
- Deploy continuous integration and continuous delivery
- Build reusable code and libraries for future use
- Optimize application for maximum speed and scalability
- You have an aptitude for rapidly learning new concepts and technologies and applying them in an agile manner
- You have up-to-date and comprehensive knowledge of current technology trends

### Relevant experiences

We'd love to hear from candidates with at least four (4) years commercial experience in a fast-paced, tech-driven/ startup environment.

You should demonstrate that you've built web applications from idea to launch and on-going updates with the passion to always push your product to the next level.

Front-end Web Developers candidates ideally have a background in informatics, computer science, engineering or comparable studies, and should be well-versed in one or more of the following technologies, tools and methodologies:

- HTML5, CSS3, JavaScript, AngularJS, ReactJS, DurandalJS, Confluence, Jira, Git, etc
- Server-side CSS pre-processing platforms and client-side scripting and JavaScript frameworks
- Asynchronous request handling, partial page updates, and AJAX
- Cross-browser compatibility issues and ways to work around them.
- Product Development (HW/SW)
- Agile Project Management
- Understanding of UX and UI design principles

**What we offer you**

- Innovative environment working for the B2B pioneer in automotive connectivity solutions
- Thrilling projects in international interdisciplinary teams with global market impact
- Attractive compensation package
- Creative atmosphere in co-working space Ahoy! Berlin
- Flat hierarchy, open collaborative culture, with English as primary language (German beneficial)
- Plenty of room for your own ideas and self-organised work to see your ideas come to life and scale globally
- Liaison with the Daimler group with the flexibility of a digital innovation lab

The job is full-time and limited to a term of two (2) years with the option of a permanent employment contract.

Location: Berlin

**How to apply for Frontend / Web Developer**

Send us an email to [innovationhub@fleetboard.com](mailto:innovationhub@fleetboard.com), with desired salary, earliest availability and with your CV.

In your email application, please explain one of your major coding challenges in the past two years: What was it about, how did you approach and solve it, what have you learned. If you have any code to share that would be a plus, but it's not required. One page will be sufficient.
