

Let's shape the future of connected logistics!

Join our Innovation Hub in Berlin as

Senior Backend Developer (m/f)

Our Berlin Innovation Hub is a space for invention and creation: we push the boundaries of connected logistics systems enabled by Internet-of-Things, artificial intelligence and data science. We are creators and developers, designers and creatives, techies and data scientists. Our way of working is collaborative: rapid prototyping for validated learning and creating MVPs is second nature for you.

We are riven by seeing our ideas launching to the market on a global scale and we are proud to evolve the product to solve our customers' pain points.

Your tasks will be

- Architecting and development of cloud-based microservice backends in Microsoft Azure
- Technical leadership of an agile cross-functional development team (designers, developers, data scientists)
- Continuous integration and deployment with the opportunity to work in a DevOps model

Relevant experiences

We would love to hear from candidates with at least five (5) years experience in state of the art methods to create RESTful (micro) services and data processing and storage concepts.

Our senior backend developer ideally should tick five or more of the following points:

- Degree in Computer Science, Software Engineering or similar qualification and relevant work experience with knowledge of corporate environments
- Experience with technical leadership of a development team / supervising junior developers
- Strong skills in .NET Core
- Experience with Microsoft Azure or another cloud platform
- Experience building web/mobile backends and APIs
- Experience with Kubernetes
- Experience with continuous integration and deployment, DevOps, ideally with VSTS
- Experience with relational and NoSQL databases
- Experience with container platforms such as Docker

- Experience in working as part of an agile cross-functional development team (designers, developers, data scientists)
- Experience working using agile methods such as SCRUM or Kanban;
- Strong problem solving skills and proven team player

A nice-to-have would be:

- Experience with Big Data
- Experience with Pythonr

And above all the motivation to work in a complex environment with lots of room for own ideas to optimize the status quo and take responsibilities to push state of the art digital solutions for business analytics solutions for the global logistics industry.

What we offer you

- Innovative environment working for the B2B pioneer in automotive connectivity solutions
- Thrilling projects in international interdisciplinary teams with global market impact
- Attractive compensation package
- Creative atmosphere in co-working space Ahoy! Berlin
- Flat hierarchy, open collaborative culture, with English as primary language (German beneficial)
- Plenty of room for your own ideas and self-organised work to see your ideas come to life and scale globally
- Liaison with the Daimler group with the flexibility of a digital innovation lab

The job is full-time and limited to a term of two (2) years with the option of a permanent employment contract.

Location: Berlin

How to apply for Backend Developer

Send us an email to jobs@fleetboard.com, with desired salary, earliest availability and with your CV.

In your email application, please describe when you successfully learned and used new frameworks. Please keep your answers concise, and limited to 300 words.
