

Let's shape the future of connected logistics!

Join our Innovation Hub in Berlin as

Frontend / Web Developer (m/f)

Our Berlin Innovation Hub is a space for invention and creation: we push the boundaries of connected logistics systems enabled by Internet-of-Things, artificial intelligence and data science. We are creators and developers, designers and creatives, techies and data scientists. Our way of working is collaborative: rapid prototyping for validated learning and creating MVPs is second nature for you. We are riven by seeing our ideas launching to the market on a global scale and we are proud to evolve the product to solve our customers' pain points.

Your tasks will be

- Frontend developer for a portal solution aligning all frontend development and acting as a coordinator and consultant
- Ensure the technical feasibility of UI/UX designs leading into a unique and holistic frontend user experience
- Collaborate with designers (UX/UI) and backend developers
- Build and drive development of web applications with user-facing features
- Drive test automation for web applications
- Deploy continuous integration and continuous delivery
- Build reusable code and libraries for future use
- Optimize application for maximum speed and scalability
- You have an aptitude for rapidly learning new concepts and technologies and applying them in an agile manner
- You have up-to-date and comprehensive knowledge of current technology trends

Education

A completed university degree in informatics, computer science, engineering or comparable studies

Relevant experiences

We love to hear from candidates with several years of commercial experience in a fast-paced, tech-driven environment ideally with the understanding of digital Innovation units in a global operating corporate You should have built web applications from idea to launch and on-going updates with the passion to always push your product to the next level in a challenging, past paced environment

Specific knowledge

- Several years of experience in developing websites and web apps with JavaScript, HTML5 and CSS3 (SCSS)
- Deep knowledge in a modern JavaScript framework like Angular or React (we use Angular 6)
- Understanding the concepts of reactive programming and the redux pattern
- Web performance and load times matter to you
- Familiarity with build tools like Grunt, Gulp, Webpack
- Experience in developing and consuming RESTful APIs asynchronously
- Understanding of UX and UI design principle

You should be interested in

- Being part of an independent DevOps team
- Getting your hands into backend topics, CI/CD, monitoring
- Collaborating closely with your designer colleagues

Nice to have would be

- Familiarity with the BEM methodology
- Experience in Docker and Kubernetes
- Experience with Microsoft Azure and VSTS
- .NET Core (C#) isn't new for you
- Experience with Kibana, Prometheus and Grafana

What we offer you

- Innovative environment working for the B2B pioneer in automotive connectivity solutions
- Thrilling projects in international interdisciplinary teams with global market impact
- Attractive compensation package
- Creative atmosphere in co-working space Ahoy! Berlin

- Flat hierarchy, open collaborative culture, with English as primary language (German beneficial)
- Plenty of room for your own ideas and self-organised work to see your ideas come to life and scale globally
- Liaison with the Daimler group with the flexibility of a digital innovation lab

The job is full-time and limited to a term of two (2) years with the option of a permanent employment contract. (also suitable for part-time)

Location: Berlin

How to apply

Send us an email to fleetboard.innovationhub@daimler.com, with desired salary, earliest availability and with your CV. In your email application, please describe when you successfully learned and used new frameworks. Please keep your answers concise, and limited to 300 words.
